

What Can *Morpheus8* Do For You?

By Dr. Brandon Richland, MD

Morpheus8 is the first and only FDA-approved technology that combines bi-polar radio-frequency (RF) with microneedling, making it a revolutionary device in the field of aesthetic treatments. This innovative treatment safely and effectively enhances the appearance, texture, and quality of the skin by promoting the body's natural healing processes.

The device's unique tip is equipped with gold-plated microneedles that penetrate the skin at depths ranging from 0.5 to 8 mm. Only Morpheus8 has the ability to control the depth of penetration precisely to target only the necessary layers of skin to ensure effective treatment for a wide range of concerns. When the microneedles penetrate the skin, they emit bi-polar RF energy, creating controlled micro-injuries in the skin. These micro-injuries stimulate the body's natural healing response, leading to the production of new collagen and elastin.

Versatile and Suitable for All Skin Types

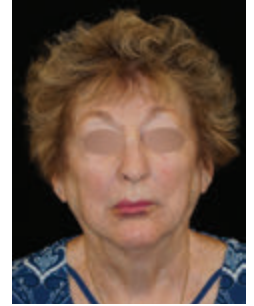

Unlike traditional laser treatments, which can pose risks for those with higher melanin levels in their skin, Morpheus8 is safe for everyone. It's commonly used to reduce the appearance of fine lines and wrinkles, making the skin look smoother, tighter, and more youthful.

Additionally, it can significantly improve the appearance of acne scars, stretch marks, and surgical or injury scars.

The treatment also helps to reduce the size of enlarged pores, leading to a more refined skin texture. Furthermore, Morpheus8 can address pigmentation issues, promoting a more even skin tone. Finally, Morpheus8 is the only RF microneedling device that effectively reduces unwanted fatty deposits while simultaneously tightening the skin!

It Tightens and Rejuvenates Too!

The combination of microneedling and RF energy allows for deep tissue heating, which enhances the effectiveness of the treatment. This deep tissue heating not only stimulates collagen and elastin, but also promotes better skin tightening and rejuvenation to provide dramatic and longer-lasting results compared to other superficial treatments.

Call 714-241-0646 to schedule your consultation and find out if Morpheus8 treatment is right for you.
